Dear Chuck:

As per your request, I talked with Peter Duncan of BTI regarding the use, on a temporary basis, of "speech plus" equipment on a program audio circuit between Caversham and Independence Hill. Peter said that [Redacted] of FBIS-Caversham had already talked to him about this, and that he would tell me the same thing he told [Redacted] namely that it might be quite an involved process to get formal BTI/BT approval, but he thought that as long as the connection is via a type-approved line amplifier, no problems should arise.
